# CHAMP CLARK

Candidate for United States Senate from the State of YOL

### TO SUCCEED SENATOR VEST.

Unwritten Law of That State That the Senators Shall Come from the Country 'lowns-An Ex-Governor Is Also a Candidate-May Not Go Democratic.

The announcement was made recent ly that Congressman Champ Clark, of Bowling Green, Mo., is a candidate for the United States Senate to succeed George G. Vest. The term of Senator Vest will expire on March 4, 1903, and the condition of the senator's health is such that it is not generally deemed probable that he will be a candidate to succeed himself. Mr. Vest is 70 years old, with a record of political service which began forty years ago in the Jefferson City legislature. He became United States senator in 1879, and has served continuously twenty years since. Mr. Vest, who is a native of Kentucky, appears in the Congress directory as a resident of Sweet Springs, and his colleague, Senator Cockrell, who succeeded Carl Schurz in the senate in 1875, is a resident of the town of War-rensburg, it being one of the unwritten laws of Missouri that United States senators, if democrats, should be chosen not from the most important cities of that state, but from those which are most obscure, and it being a well understood fact that in elections to the sen ate St. Louis, which is the most important of the cities of Missouri, and th most important city of the Mississippi Valley, should be entirely ignored.

Democrats Come from Country. Whenever,, before the present demo-cratic regime, senators from Missouri have been elected by the republican party, adequate, if not discriminating recognition has been given to the city of St. Louis, but among democrats a contrary rule has prevailed, and therefore the candidacy of Champ Clark, of Bowling Green need be no more cause of surprise than that of other aspiranes for senatorial honors in Missouri, one of the best known of which were Richard P. Bland, of Lebanon, David A. De Armond, of Butler; and Alexander Monroe Dockery, of Gallatin, the present democratic candidate for governor of Missouri. Mr. De Armond, usually called "the judge," represented one of the congress districts of Missouri in the last house in congress, and he was one of the leading candidates for the democratic nomination for speaker which afterward went to Richardson, the democratic publisher of the president's messages, copyrighted, of Tennessee. Born in Kentucky.

Irrespective of the intentions of Senator Vest to stand for re-election, Congressman Clark will not have a clear field, for there is another candidate in the race, former Governor Stone, who was vice chairman of the democratic national committee of four years ago, and aspires to the lead of the democratic party in Missouri. Mr. Stone like Senator Vest, is a native of Ken-

He was born in Madison county, in that state, and after a brief residence in Missouri moved to Indiana. Later he returned to Missouri and was twice elected from one of the congress districts of that state to Washington. In 1892, the year of the second election of Cleveland as President, Mr. Stone was chosen governor of Missouri, a post the term of which is four years. In 1896 he was national committeeman on the democratic side from that state and took an active part in securing the choice of Mr. Bryan as the presidential candidate, though ostensibly a support-

The basis of division of legislative districts in Missouri is such that, entirely irrespective of the popular vote of that state, the backwoods districts, as they are sometimes called, control the choice of senators. At the last general election in Missouri in 1898 the democratic majority was 20,000. The city of St. Louis gave 10,000 republican majority, but outside of it the democrats were 40,000 nhead. The last Missouri legislature had a membership of 107 democrats and populists and of only 67 republicans, and although many Missou republicans are very sangulae this year of electing their candidate for governor, Joseph Flory, who is an old railroad man, having been a conductor on the Wabash (railroad, not river), present indications point to continued democratic control of the state legislature and the choice of a democratic successor to Mr. Vest and a comporation colleague to Mr. Cockecii.

## Roosevelt at Headquarters.

NEW YORK, Aug. 6 Governor Theodore Roosevelt, Republican nominee for the vice-presidency, was at po litical headquarters here to-day, Outlining his plans for the next three months Governor Roosevelt said his first public address would be a non-political one in Chicago on Labor Day, political one in Chicago on Lab September 3. From Chicago the governor will go further west, until October 15, when he returns to New York. From that time be will speak only in New York state. He said that he was assigned to cover every county in New

Cut in Wages. SYRACUSE, N. Y., Aug. 6.-Sweet's steel company has made a cut in wages averaging about 12 per cent. Depression in the steel market was given as cause. A year ago the company voluntarily raised the wages of its 150 employes. The men had a conference with W. A. Sweet, president of the company, to-day, but no agreement s reached, and the greater number of men refused to work.

## Gen. Miles Reviews the Guard.

MOUNT GRETNA, Pa., Aug. 6.-Licutenant General Nelson A. Miles arrived in Camp Alexander L. Hawkins Pennsylvania militin, which is now in camp here. He was received with the Beutenant general's salute. In the afternoon General Miles was given the

honor of a review and a march past, The entire guard of the state, num-bering over 10,000 men, took part in the parade.

About the Congo Free State. LONDON, Aug. 6.—Replying in the house of commons to-day to a question put by Sir Charles Dilke; radical, the parliamentary secretary of the foreign office, Mr. Broderick, said the authorities of the Congo Free State admitted that British territory above Albert Nyanza had been raided by Congo troops and that women and cattle had been carried off. Mr. Broderick added that the Congo Free State authorities had apologized for the raid and sought to punish the invaders.

### FINANCE AND TRADE.

The Features of the Money and Stock Markets.

NEW YORK, August 6.-Money or call easy at 11/01% per cent; last loan, 11/2 per cent. Prime mercantile paper 41/205 per cent. Sterling exchange firm, with actual business in bankers' bills at \$4 85@4 851/2 and \$4 89. Commercial bills, \$4 83%. 64 83%. Silver certificates, 614@624c. Bar silver, 60%c. Mexican dollars, 48½c. Government bonds weak. State bonds firm. Railroad bonds irregular.

The early dealings in the stock mar-

ket showed a survival of last week's

strength, but it gave way in face of the day's developments, and the market yielded whatever gains had been established. The final prices, measured in comparison with the high leve of the day, show some considerable losses, and are the general rule. The early movement was especially notable in the Pacifics, Northern Pacific taking the lead on the theory that its price was not commensurate with the level of Union Pacific and Missouri Pacific. Union Pacific also continued firm. Reading first preferred was taken in quite large amounts, on the supposition that the dividend rate would be in-creased at to-day's meeting. The stock fell back 1½ per cent when the declaration of the same rate of divi-dend as the last was announced. Sugar weakened on the report of the shading of several grades of soft sugar, which was taken to indicate a renewal of competition in the trade. cheerful feeling regarding the iron and steel stocks, which has been in evidence for some time past, lifted prices in that group. Colorado Fuel was conspicu-ous. The preferred stock was bid up from 120 to 125,, at which price 100 shares changed hands. The bid price was then further advanced to 127% without bringing out stock. stock is cumulative, and is entitled to 20 per cent in back dividends. movement is supposed to foreshadow the payment of an installment of the arrearage of dividends. The steel group weakened later in the day. The circumstantial accounts from Pittsburgh of extensions by the Carnegie company looking to competition with some of the new combinations affected the group, especially Federal Steel and Steel and Wire. The more serious phase developed in the Chinese situation had some effect on the market although the London exchange was closed, and the influence of the news there could not be well measured. Preparations for exports of gold on Wednesday were reported, though no definite announcement was made of engagements. Sterling exchange rose an additional fraction but still falls short a shade of what had been regarded as the export point to London. The subscriptions in New York to the new issue of British exchequer bonds are generally regarded as the immediate cause of the outward movement. It is evident that these subscriptions would not necessarily demand an outward movement of gold, as the country's very large credits abroad would be ample to cover the subscriptions, but the urgent need of the London money market for gold may have led to some special provision that the underwiting syndicate should provide that metal in payment of the bonds There is a large demand for the bonds, as a matter of course, in view of the fact that the American rallroad bonds of high grade are finding their way home on every steamer, and foreign railroads and industrial securities are not in favor of the Amer declining tendency of earnings abroad. Opinon here as to the effect on the money market has crystallized into a conviction that no severe

view of the coming demands on the money market, is much doubted. The bond market continued at a very low ebb of activity, and the movemen of prices was slight. Total sales, par

strain need result. The feasibility of

any large speculative movement, in

Breadstuffs and Provisions

CHICAGO-Grain markets to-day

Breadstuffs and Provisiona.

CHICAGO—Grain markets to-day were influenced by weather conditions, both as regards tone and amount of bunness. The weather locally was too not for the traders, but wet weather in England helped to give the market a ilrm tone, September closing at 160 fee and a devance. Hot winds in Kansas resulted in an advance of 26 in corn. Oats closed 360 fee higher, and provisions unchanged to 6c higher.

Offerings of wheat at the opening of that market were very light, and the presence of buying orders in moderate numbers sufficed to give the market a fairly firm tone. There were no Liverpoot quotations, the English market being closed on account of holidays, and local traders were somewhat uncertain as to their course at first. Initial trading in September was at 756754c, a shade advance over Saturday's closing, and a further advance to 755c took place within a few minutes. Local bears, encouraged by the heavy receipts at all primary points, then attempted to force prices down in the chosence of any material support, and their offerings did result in a reaction to 75c. But at the decline, fair sized buying orders were received from New York and the morthwest, and as soon as the local offerings were withdrawn the price immediately reacted again to 75k. After II o'clock the market for the most part was excessively dull. The weather was too hot for the traders to take much interest in trading, and the result was that prices kept within a narrow range. A mild renewal of the take much interest in trading, and the result was that prices kept within a narrow range. A mild renewal of the selling pressure sent the September price to 14% co no no or two occasions, but the declines always brought moderate support and consequent recovery in prices. Toward the close of the sestion the local crowd, which was evidently short, attempted to cover, but found l'ttle wheat for sale, and the market became quite strong. September advarced from 75¢, around which it had held for some time, to 75% 675½c. Considerable buying caused by the reports of linessant rains in England and the consequent interruption of harvesting operations, and also by the strength developed in corn. veloped in corn.

Veloped in corn.

Northwest receipts were 393 cars, against 250 last week and 270 a year ago. Chicago receipts were 211 cars, 19 of contract grade. Total primary receipts were 1,445,000 bushels, compared with 756,000 bushels a year ago. Atlantic port clearances of wheat and flour amounted to 425,000 bushels.

Corn enjoyed a brief interval of prosperity around the opening. Benorits of

amounted to 25,000 manels.

Corn enjoyed a brief interval of prosperity around the opening. Reports of extensive damage in the southwest by hot winds caused quite a scramble at first, and prices shot up quickly. The buying for some time was quite general, but the demand was gradually satisfied, and during the latter part of te ression the market was fully as full as wheat. Country acceptances in light, and shipments much expenditure of the series of the series

firm, traders being influenced by the strength of corn, and an early advance was maintained. There was moderately good outside buying at times. Receipts were 68 cars. September ranged from 21½c to 21½c, and closed %6½c higher at 21½621½c.

Provisions were dull all day. Lower hog prices and fears of further yellow fever developments made buyers timid at first and opening prices were lower. fever developments made buyers timid nt first, and opening prices were lower. Offerings were small, and later the firmness of corn had influence on trading. Packers bought moderately of ribs and pork. At the close September pork was unchanged at 511 85; September lard 2½c higher at \$6 82½, and September ribs 5c higher at \$7 12½@7 15. Estimated receipts to-marrow:

Wheat, 255 cars; corn, 315 cars; oats, 735 cars; hogs, 15090 head.
